Chisom Monica Onuorah

Product Manager | Ottawa, Canada | chisomonuorah20@gmail.com | LinkedIn | ClaimCheck: live app

Lawyer-turned product manager who builds products that are useful and safe to use. Shipped products through HNG's 10-stage elimination internship (one of 450 finalists from 12,362 interns), led a multi-store inventory and POS product for retailers as a volunteer PM, and partnered as a creator with e-commerce brands, including Shopify merchants. Recently built ClaimCheck, an AI tool that helps small merchants catch risky marketing claims before they publish.

BUILT AND SHIPPED

ClaimCheck — Founder and Builder | Live app *Nov 2026*

- Built and shipped an AI web app (v0, Next.js, Vercel AI SDK) that flags risky claims in product listings and influencer captions, explains each risk in plain language, and suggests compliant rewrites (Canada/US).
- Designed the system prompt and structured output schema with trust guardrails (exact quotes, no invented laws, injection protection), drawing on legal training.
- Built a 10-scenario test suite (clean copy, emoji-heavy captions, French text, prompt injection) to check accuracy; now validating with Shopify merchants from my creator network.

Content Creator and Brand Partner — Self-employed | Instagram (29K followers) *Ongoing*

- Partnered with e-commerce brands, including Shopify merchants, on sponsored Instagram campaigns.
- Promoted exclusive discount codes (up to 20% off) that turned followers into paying customers for partner brands.
- Learned first-hand what drives clicks, trust and purchases for small merchants in social commerce.

EXPERIENCE

Product Manager Intern — HNG Internship | Remote *Oct 2025 – Dec 2025*

- One of 450 finalists from 12,362 interns (top 4%); shipped products with engineers, designers, DevOps and marketers.
- **Zedu** (AI learning platform for bootcamps and schools): researched competing tools to define what would set the MVP apart, and wrote requirements for core MVP features.
- Turned requirements into ClickUp tickets for developers, then assigned and tracked them through to release.
- **ContentQ** (creator productivity app): defined requirements and user flows for idea capture, tasks and notifications; took the MVP from idea to launch in 8 weeks.
- Defined QA test cases and tracked issues to resolution across backend, mobile and data tracks.

Product Manager (Volunteer) — Nugi Technologies | London, UK (Remote) *Jan 2025 – Aug 2025*

- Led product delivery for Syncventory, a multi-store inventory and POS platform for managing stock and sales across stores.
- Wrote PRDs, user stories and acceptance criteria for core sales, inventory and multi-store stock features.
- Led feature planning end to end, from problem definition and prioritization to release, refining the backlog through stakeholder feedback.
- Defined QA and UAT scenarios with engineering, design and data teams, verifying fixes before each release.

Head of Contract and Insurance — Lekki Gardens Real Estate | Lagos, Nigeria *Jun 2021 – Jun 2022*

- Redesigned the letter-of-award workflow, cutting contract turnaround time by 40%.
- Introduced a review checklist for contract documents, reducing drafting errors and strengthening legal compliance.
- Streamlined all-risk insurance and change-of-ownership documents so projects started on schedule.

EDUCATION

MSc Health and Social Care — University of Wolverhampton, UK *2022 – 2023*

B.L. — Nigerian Law School *2021*

LL.B. Law — Anambra State University, Nigeria *2014 – 2019*

- Chamber Head, Law Faculty: ran 40+ moot court trials and debate events averaging 150 attendees.

CERTIFICATIONS

- **Product Management Certification** — Product School, 2024 (capstone: tiered hospitality bundles and 3 product features)
- **AI Literacy for Legal Professionals, Level 1: Foundations** — Harvey, 2026 (AI risk, data privacy, prompting)

SKILLS

- **Product:** user research, PRDs and user stories, prioritization, roadmapping, sprint planning, QA/UAT, success metrics
- **AI and building:** v0, Claude, ChatGPT, Gemini, Lovable; system-prompt design, structured AI outputs, AI risk and privacy
- **Tools:** ClickUp, Jira, Notion, Confluence, Figma, GitHub, Vercel
- **Domains:** e-commerce and retail, creator marketing, legal and compliance, health and social care
